SMED

New in the fair segment in the country, **SMED** is a methodology that aims to reduce setup time. Visitors checked out the rapid mold change techniques, speeding up a costly process for the injection and extrusion machines to less than 10 minutes.

Result of a partnership of the event with **SENAI** and a group of companies: **Romi, Stäubli, Berg Steel, Piovan** and **Previsão**.

The **LF School** was also present at the event offering a **workshop with certificate** on SMED techniques.

The space was created in partnership with **ABINFER - Brazilian Toolmaking Industry Association** and was dedicated exclusively to tooling manufacturers.

THE **ABINFER BUSINESS CENTER – ABC 2023** presented visitors with a complete solution of products and services through the 21 companies present, in addition to the knowledge transmitted in lectures and workshops in an exclusive auditorium over 5 days of the event.

The **Sustainable Development Goals** are a global call to action to end poverty, protect the environment and climate, and ensure that people everywhere can enjoy peace and prosperity.

In order to align sustainability and content initiatives with the SDGs, actions were carried out during the event in favor of the global action plan.

SDGS THAT WERE GUIDES FOR OUR ACTIONS DURING THE FAIR:

PLÁSTICO BRASIL RECYCLING

During assembly and disassembly, we received **BB Ambiental** a cooperative that collects all types of waste. Tarpaulins, berries, fabrics and with separation in buckets and correct destination and donation to the community were collected.

During the five days of the fair, we collected from the exhibitors' booths the plastic products produced for demonstration, totaling 12,365kg of plastic.

The amounts collected were donated to the **Safrater Institution – Sociedade de Amparo Fraternal Casa do Caminho**
